

HAIBAZO - Entrance Test

Intern Software Engineer

Tasks

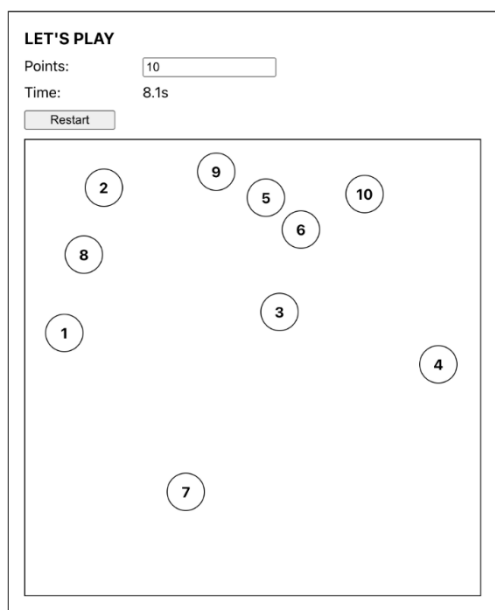

As a Software Engineer, your job is to analyze requirements from the gameplay video and execute the following tasks:

Tasks

1. Develop the game using React
2. Deploy your game to any hosting service

Gameplay

[HAIBAZO React EntranceTest.mp4](#)

Notes

1. **ALL CLEARED** should display only when all points have disappeared completely
2. All 6 cases must be implemented and tested thoroughly
3. You are welcome to be creative with your game (without changing the game logic)

Output

Required

1. GitHub repository URL
2. Deployed web URL
3. Screen recording URL (coding process)
